

# LAKE TAHOE

## California Dreaming - Sun & Powder Snow

The spectacular scenery and endless snow make this a real winner!

### NORTHSTAR

Lake Tahoe is a superb large freshwater lake in the Sierra Nevada mountains located along the border of California and Nevada. We are pleased to be able to offer two of the top ski resorts in the area - Northstar and Sierra at Tahoe – interchange them throughout the week and set your own itinerary! Northstar is situated six miles from the north of the lake. The mountains - Mount Pluto and Lookout Mountain - offer 70 trails and 2490 acres of skiable terrain. The downhill slopes vary ranging from gentle bowls to long, steeper runs serviced by a modern network of lifts. With a fantastic snow record and a season until the end of May, this is a surefire winner! Sierra-at-Tahoe is the closest major snowsports resort to San Francisco and a stone's throw away from the glitz of South Lake Tahoe and a multitude of superb hotel options. A big asset of Sierra is the location of its slopes, which are wind protected and cradle the fresh powder for days. Skiers and riders of all ability levels can easily find their niche here, whether it's exploring the never-ending tree skiing or cruising down a 2.5 mile beginner run from the 8852 foot summit which affords panoramic views of Lake Tahoe.
