

 MAMMOTH

*Mammoth by name, Mammoth by Nature!*

*Mammoth skiing in one of the West Coast's top resorts!*

This superb resort is situated high in the Sierra Nevada mountain range and boasts over 3500 acres of slopes, a vertical drop of 3100 feet and 300 days of Californian sunshine! Plus an average annual snowfall of 353 inches - you can see why Mammoth is regularly voted one of America's top ski resorts. Mammoth is the West Coast ski destination. Both skiing and scenery are jaw droppingly awesome!

Magnificent powder snow, over 150 marked trails and a ski season that can last into July. Continual investment from its owner, Intrawest, ensures that the terrific facilities are continually improved and extended in this famous resort. Combined with a stopover in Los Angeles, including a visit to Universal Studios, Mammoth has to be one of the most impressive skiing destinations a school could ever dream of.
